CUSTOMER INFORMATION:

1a. TABLE OF AWARDED SPECIAL ITEM NUMBERS (SINs)

SIN	Description
611430	Professional Services – Training Professional and Management Development Training Services include offering an array of short duration courses and seminars for management and professional development. Training for career development may be provided directly to individuals or through employers' training programs, and courses may be customized or modified to meet the special needs of customers. Instruction may be provided in diverse settings, such as the establishment's or agency's training facilities, and through diverse means, such as correspondence, television, the Internet, or other electronic and distance-learning methods. The training provided may include the use of simulators and simulation methods. Proposed professional services shall be in support of planning, creating, and/or executing testing and test administration, learning management, internship, or development of new courses or subject matter delivered via an instructor-led (i.e. traditional classroom setting or conference/seminar) and/or web-based (i.e. Internet/Intranet, software packages and computer applications) system.
611430ST	Security and Protection - Security Services Security Training Includes all security training related to law enforcement, security, emergency preparedness and/or first responders. Examples include instructor-led training, web-based training, pre-set courses, training development, consulting services, Continuity of Operations Planning (COOP) services, etc NOTE: Subject to Cooperative Purchasing
OLM	Order Level Materials -OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs. OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

Order-Level Materials (**OLM**) - Order-level materials (**OLMs**) means products, services, and/or solutions (a combination of products and/or services) acquired in direct support of an order placed against a FSS contract, including orders under FSS BPAs, when the products, services, and/or solutions are not known at the time of FSS contract or FSS BPA award. **OLM** pricing is not established in FSS contracts or FSS BPAs.

NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

1b. LOWEST PRICED MODEL NUMBER AND PRICE FOR EACH SIN: (Government net price based on a unit of one)

No Products offered

1c. HOURLY RATES: (Services Only) See Pricing

2. MAXIMUM ORDER*: 1000000

NOTE TO ORDERING ACTIVITIES: *If the best value selection places your order over the Maximum Order identified in this catalog/pricelist, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the aforementioned contractor for a better price. The contractor may (1) offer a new price for this requirement (2) offer the lowest price available under this contract or (3) decline the order. A delivery order that exceeds the maximum order may be placed under the schedule contract in accordance with FAR 8.404.

3. MINIMUM ORDER: None

COURSE DESCRIPTIONS

Security Project Management Seminar

SINs 611430ST, 611430

Course Length: 20 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

This 2.5-day, instructor-led training program enables integrators, installers, and end-users who manage security projects to gain a full understanding of how to effectively plan, implement, manage, and monitor a project from initiation to close. Attendees gain a clear perspective on the importance of their role as leaders and project stakeholders and learn to how mitigate risks and overcome barriers that could hinder project success. As part of the SPM training seminar, attendees receive comprehensive learning materials to help guide the planning and execution of future security projects.

Basics of Security Project Management

SINs 611430ST, 611430

Course Length: 10 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

The Basics of SPM Course covers the essential elements of project planning, initiation, implementation, monitoring and closing. This live, instructor-led course offers 10 hours of interactive, virtual instruction over the course of four days (2.5-hour sessions each day) and is held regularly throughout the year. This is SIA's most affordable SPM training and is a great introductory course for new PMs as well as for team training.

Certified Security Project Manager (CSPM) Credential

SINs 611430ST, 611430

Course Length: 2 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

The CSPM credential is a highly respected designation that can help advance your career and propel your business forward. The CSPM is the only credential that addresses the unique demands of a Security Project Manager. More than a general project management certification, the CSPM demonstrates that holders of this credential have mastered the skills for managing complex, technical security projects.

CSPM Review Course

SINs 611430ST, 611430

Course Length: 8 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

The new CSPM Review Course helps prepare individuals for the Certified Security Project Manager (CSPM) exam. This one-day course covers key concepts and skills outlined in the CSPM exam blueprint that will help candidates assess their readiness to take the exam and identify areas for additional study. This live, instructor-led training course is delivered completely online and is also available on-demand.

Security Industry Cybersecurity Certification (SICC)

SINs 611430ST, 611430

Course Length: 2 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

The Security Industry Cybersecurity Certification (SICC) is the industry's only credential focused specifically on cybersecurity for physical security systems. The SICC has been developed for integrators, manufacturers, consultants, and other related industry professionals who are responsible for technically supporting the installation, networking, configuration and/or specification of electronic security/low-voltage technology devices and is designed to ensure these professionals have hands-on experience working with industrial controls, safeguarding assets and processes and possess a deep understanding of physical security and cybersecurity convergence. The program is designed to assess and validate the core competencies these individuals must possess to effectively perform jobs involving critical aspects of cybersecurity.

SICC Review Course

SINs 611430ST, 611430

Course Length: 8 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

The SICC Review Course is designed to help prepare individuals for the certification exam using proven instructional design techniques and interactive learning tools. This comprehensive, two-day course covers key concepts and skills that directly correspond with the ten knowledge domains outlined on the SICC exam blueprint. During the course, experienced instructors will guide participants through an in-depth review of the key knowledge domains and subdomains of the SICC exam, discuss exam preparation strategies, and provide direct feedback on any questions.

OSDP Boot Camp

SINs 611430ST, 611430

Course Length: 8 hours

Maximum Participants: 35

Location: Customer Facility or Contractor Facility

SIA's OSDP Boot Camp is daylong in-depth training on how to design, configure and deploy modern, interoperable, OSDP-compliant access control systems. Attendees will learn how to do business more effectively with sophisticated firms that demand current security technologies, receive the information needed to train teams on OSDP, gain the skills to transition from legacy access control to today's modern technologies and more.
