

## COMPANY DESCRIPTION

**Windy City Wire** was established in 1994 as a wire and cable distributor specializing in low-voltage cable for the building automation and temperature control market, today **Windy City Wire** has become the standard by which all other low-voltage wire and cable suppliers are measured. Our philosophy of investing, innovating and putting the integrator first has propelled the company from a small warehouse space servicing a single market segment, into a complete manufacturing and distribution company. Producing goods and services for all the major low-voltage markets and systems. Our corporate facility in Bolingbrook, Illinois is the heart of our organization, with 18 additional locations nationwide, all with available stock and fast delivery times.

**We are the manufacturer. We are the distributor. 100% of SmartWire cable is American Made.** We are consistent, we are creative, we have a solution that allows our customers to do more with less by offering a solution that creates a safe and productive working environment. **We are the first manufacturer and distributor to create and stock an OSDP Composite Cable.** We have the ability to create whatever wire combination you need and the capacity to deliver it when and where you need it, helping you get your job done!
